

TRILOGY[®]

LENSES

The lightest
optical material

Harmful
light protection

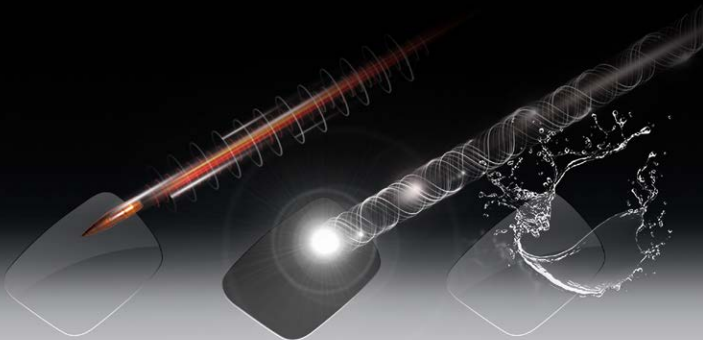

The
strongest
optical material

Ultimate protection
for your eyes

TRIL

Trilogy® Trivex® lenses are a great choice for all types of glasses. But they are practically a necessity for cases where other lenses will not perform to the highest standard

- Children Eyewear
- Sports Eyewear
- Professional safety eyewear
- Rimless frames eyewear
- Jewelry decorated eyewear

More Choices

- **Clear lenses**
- **Transitions® Signature® Trilogy®** lenses are the smart alternative to clear lenses. They are completely clear indoors and adapt to the right amount of light outdoors.
- **Transitions® XTRActive® Trilogy®** are the darkest photochromic lenses for outdoor life style.
- **Nupolar® Trilogy®** are extremely efficient in blocking blinding glare, improving the contrast, color depth perception and overall visual acuity. Ultimate sunglass lenses.
- **Drivewear® Trilogy®** effectively block blinding glare in any weather, intelligently and quickly adapt in the car and outside (darken or fade) depending on driving conditions.

Why Trilogy Trivex?

The strongest optical material

Extraordinary impact resistance

Lowest internal stress

The lightest optical material

1.11 g/cm³ density is 20% lower than
standard 1.50 lenses

Harmful light protection

Block 100% UV light

Reduce aggressive blue light*

Lifetime warranty against breaking in any frame

Consult your optician to select the most
suitable Trilogy® configuration.
